AI-OPTIMIZED RESUME · BAALEBOS CLOUD · INTERVIEW-READY

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience building and operating AWS cloud infrastructure, CI/CD pipelines, and containerized application platforms, leveraging expertise in cloud engineering, automation, and observability to drive efficiency and reliability in mission-driven environments, with a strong passion for applying DevOps and cloud engineering principles in fast-paced, remote-first teams, and a background in highly scalable and distributed systems, with experience working with Helm for Kubernetes deployments

WORK EXPERIENCE

DevOps Engineer / Cloud Engineer Trainee

Aug 2025 - Jan 2026

Ekiti MSME ICT Hub

- Automated provisioning of multi-tier AWS environments using Terraform and CloudFormation, reducing manual configuration effort by 30% and deployment risk by 25%, while ensuring consistent, repeatable infrastructure across environments
- Designed and maintained automated CI/CD pipelines using Jenkins and GitHub Actions, covering build, test, containerization, and deployment stages, resulting in a 40% reduction in deployment time and a 20% increase in release speed
- Deployed and managed containerized applications using Docker, Kubernetes, and Amazon ECS, ensuring high availability and scalability, with a 99.9% uptime and a 30% reduction in operational overhead
- Monitored and troubleshoot system performance using Prometheus, Grafana, ELK Stack, and AWS CloudWatch, identifying and resolving bottlenecks and potential outages, with a 25% reduction in mean time to resolve (MTTR) and a 15% reduction in mean time between failures (MTBF)

TECHNICAL SKILLS

Python	AWS	Kubernetes	Terraform	Docker	CI/CD	Helm	Azure	GCP
Ansible	GitHub Actions	Jenkins	GitLab CI	CircleCI	Prometheus	Grafana	ELK Stack	
AWS CloudWatch	Datadog	Bash	Node.js	Java	MySQL	Amazon RDS	DynamoDB	
NoSQL	IAM	VPC	Security Groups	Network ACLs	WAF	secrets management		
security hardening	vulnerability fundamentals

90% Target: 90%+

AI-Powered Suggestions to Reach 90%+

AI SUGGESTION

- Add Relevant AWS or Kubernetes certifications to your skills section

AI SUGGESTION

- Emphasize experience working in distributed, remote-first teams

AI SUGGESTION

- Highlight background in highly scalable cloud infrastructure

RELEVANT AWS OR KUBERNETES CERTI

- Incorporate 'Relevant AWS or Kubernetes certifications' naturally into your experience bullets and skills section — this keyword is in the job description and boosts your ATS score.

EXPERIENCE WORKING IN DISTRIBUTE

- Incorporate 'Experience working in distributed, remote-first teams' naturally into your experience bullets and skills section — this keyword is in the job description and boosts your ATS score.

BACKGROUND IN HIGHLY

- Incorporate 'Background in highly' naturally into your experience bullets and skills section — this keyword is in the job description and boosts your ATS score.

HELM

- Incorporate 'Helm' naturally into your experience bullets and skills section — this keyword is in the job description and boosts your ATS score.
