

PROFESSIONAL SUMMARY

Senior DevOps Engineer with experience in managing cloud infrastructure, CI/CD pipelines, and Linux servers, seeking to leverage expertise in AWS, Kubernetes, and Terraform to drive innovation and efficiency. Proven track record of successfully deploying applications and managing infrastructure. Committed to delivering high-quality solutions that meet business needs.

WORK EXPERIENCE

DevOps Engineer

2021-2024

TechCorp

- Optimized and managed Linux servers and deployments, ensuring 99.9% uptime and reducing downtime by 30%
- Collaborated with cross-functional teams to design and implement cloud infrastructure, utilizing AWS and Terraform to improve scalability and efficiency
- Streamlined CI/CD pipelines using Jenkins and GitHub Actions, resulting in a 25% reduction in deployment time and a 15% increase in code quality

Software Engineer

2019-2021

StartupXYZ

- Developed and deployed backend APIs using Python, resulting in a 40% increase in application performance and a 20% reduction in latency
- Deployed applications to servers, ensuring seamless integration and minimizing downtime

TECHNICAL SKILLS

Python

Linux

Git

Docker

Bash scripting

AWS

Kubernetes

Terraform

CI/CD

Jenkins

GitHub Actions

Baalebos AI — Optimization Report

ATS Score: 78.5% · Target: 90%+ · 3 suggestion(s) · May 02, 2026

Current Score: 78.5%

90%
Target: 90%+

AI-Powered Suggestions to Reach 90%+

AWS

- Add AWS certifications and specific services used (EC2, RDS, S3, EKS)

KUBERNETES

- Mention container orchestration experience with Kubernetes clusters

TERRAFORM

- Add Infrastructure as Code experience with Terraform
