

OLUWADARE TOBI JAYEOLA

DevOps Engineer | Cloud Engineer | Location: Nigeria | +2347067158165 | jayeolaoluwadamilare@gmail.com | LinkedIn: <https://linkedin.com/oluwadare-jayeola-6874591b4>

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience designing, automating, and operating AWS-based infrastructure using Infrastructure as Code, Committed to integrating security standards CI/CD practices. Passionate about customer-focused cloud solution design and solving real business problems through automation, reliability engineering, and scalable architecture. Experience supporting cloud environments using Terraform, CloudFormation, Docker, Kubernetes, and monitoring tools in Linux systems. Demonstrates innovation, leadership potential, and mentoring through documentation, knowledge-sharing, and collaborative DevOps practices. Currently preparing for AWS Certified Solutions Architect Associate certification and exploring Generative AI and Machine Learning applications in cloud environments. Test-driven development mindset' or reference TDD in Agile practices, Site Reliability Engineering' mindset and 'systems observability' alongside automation, and scalable architecture.

CORE SKILLS

- Cloud Platforms:** Amazon Web Services (AWS), exposure to Azure and Google Cloud Platform (GCP)
- Infrastructure as Code:** Terraform, AWS CloudFormation, Ansible, IaC
- CI/CD & DevOps:** Jenkins, GitHub Actions, GitLab CI, CircleCI, Git, Agile practices, SDLC familiarity
- Programming & Scripting:** Bash, Python (basic), Node.js, Java, Cassandra
- Containers & Orchestration:** Docker, Kubernetes, Amazon ECS, Amazon EKS
- Monitoring & Logging:** Prometheus, Grafana, ELK Stack, AWS CloudWatch, Datadog, AWS EC2, S3, R53, Firewall
- Databases:** RDS, DynamoDB (fundamentals), MySQL, NoSQL concepts
- Systems & Networking:** Linux (Ubuntu), Unix fundamentals, IAM, VPC, AWS Security Groups, Network ACLs, WAF fundamentals
- Innovation Areas:** Generative AI exposure, Artificial Intelligence fundamentals
- Security & Compliance:** IAM policy management, security hardening, vulnerability assessment fundamentals, secrets management exposure

PROFESSIONAL EXPERIENCE

Ekiti MSME ICT HUB - Cloud Computing Trainee Aug 2025 – Jan 2026

- Built and maintained CI/CD pipelines for cloud-based applications, improving release speed and deployment consistency.
- Automated AWS infrastructure provisioning using Terraform and CloudFormation, reducing manual configuration effort and deployment risk.
- Supported customer-focused cloud environments including compute, storage, networking, and IAM configuration.
- Implemented monitoring, logging, and alerting using Prometheus, Grafana, ELK Stack, and AWS CloudWatch, reducing MTTR by over 40% through automated alerting. Demonstrated leadership by documenting automation workflows and mentoring peers on CI/CD and infrastructure as code practices.
- Administered Linux servers including user management, security hardening, patching, and performance monitoring. Applied Agile-inspired workflow practices for iterative deployment and continuous improvement. Developed Python scripts for automated system configuration and deployment workflows

Environment: AWS, Linux, Terraform, Docker, Jenkins, GitHub Actions, Prometheus, Grafana.

SELECTED PROJECTS

- Cloud Infrastructure Automation:** Provisioned multi-tier AWS environments with Terraform, including networking, compute, and security components.
- CI/CD Pipeline Implementation:** Designed automated pipelines for build, test, and deployment using Jenkins and GitHub Actions.
- Observability & Monitoring:** Implemented metrics, logs, and alerts to support system reliability and faster incident response.
- Multi-Cloud Practice Project:** Deployed Linux virtual machines in Azure and Google Cloud Platform (Compute Engine), configured basic networking and IAM access, and compared VPC/VNet configurations across providers. **Microservices Deployment:** Containerized and orchestrated microservices using Docker and Kubernetes

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) | AWS Educate: Introduction to Generative AI | AWS Certified Solutions Architect – Associate (In Progress) | AWS Cloud Essentials | AWS Billing and Cost Management | 3MTT – Data Science/Machine Learning

EDUCATION

Bachelor Science Degree. Entrepreneurship & Business Management - National Open University of Nigeria (In Progress)

Ekiti MSME ICT HUB – Cloud Computing 2026

ADDITIONAL INFORMATION

- Open to DevOps Engineer and Cloud Engineer roles | Experienced working fully remote and across time zones
- Strong documentation and asynchronous communication skills | Actively developing skills across multi-cloud and platform engineering
